CORRESPONDENCE &  
SELECTMEN'S MEETING

12-22-2016

J-2

Paul R. LePage  
GOVERNOR

David Bernhardt  
COMMISSIONER  
November 15th, 2016

Ladies and Gentleman:

**Subject: MainesDOT Light Capital Paving Operations for 2017**

The Maine Department of Transportation (MainesDOT) has funded approximately 600 miles of Light Capital Paving (LCP) across the State for summer 2017. A copy of the LCP projects including municipalities and roads to be paved is included with this correspondence. Location maps showing the specific areas are also attached and may be found at the MainesDOT web link below in early January. Scroll down to the 3/15/2017 advertise date and click on "View Map" for your LCP area.

<http://www.maine.gov/mdot/projects/workplan/annual/>

Paving, in general, will consist of an average depth of 5/8-inch. For LCP projects, utility pole relocations are not planned as part of the projects. Adjustments to buried facilities are usually not required, but utilities will be contacted and adjustments made if required. LCP typically will not be completed at any at-grade Railroad crossings unless other arrangements have been made. If you have a facility which you feel may be impacted, or are planning to install or upgrade any structure(s) in any of these roadways, please contact the LCP Paving Manager or Utility Coordinator for the Region, so that proper coordination can be addressed. If you have questions regarding the paving schedules, please contact the LCP Paving Manager for the respective Region.
